I am a Lead Product Designer with 20+ years of experience leading and mentoring digital product teams across a wide range of industries. Lately, I've been focused on designing agentic systems and purpose-built interaction patterns that make it easier for people to work with AI and solve complex problems. My job is to empathize with the user, understand the challenges, concept solutions, build prototypes, test, iterate, and deliver. I do all of this to create thoughtful, effective experiences that meet real human needs and drive business outcomes.

My parents have no idea what I do.

Essential Skills

Visionary - Intentional thinking before fast doing. I define what's actually being solved, in what order, what the team is missing, and what emerging capabilities might change the approach entirely, so the work that follows goes in the right direction from the start.

Creative - Deliver work that's both beautiful and functional. Imagination without logic ships pretty things that don't work. Logic without imagination ships things nobody wants to use. I don't compromise either.

Organizer - Build the foundations that keep teams fast. Design patterns, component libraries, and documentation that eliminate redundant decisions and let teams focus on harder problems.

Builder - Reduce risk before engineering starts. High-fidelity prototypes built with the best tools available, including the latest generative AI techniques, that answer the hard questions early: interaction, edge cases, and feasibility, before a single line of code is written.

Mentor - Raise the team's ceiling, not just my own output. I train and upskill designers to challenge assumptions, think more rigorously, and ship work they're proud of.

Mentor - Always the first to change the way I work when something better comes along. I constantly experiment with new AI tools and techniques, adopt what makes me sharper and faster, and bring that forward-leaning mindset directly into my practice and my team.

Experience

APR 2024 - PRESENT

Lead Product Designer - AI

IBM

Leading product design for IBM Network Intelligence, a network-native agentic AI platform that helps telecom and enterprise operators detect issues, identify root causes, and act on AI-generated remediation plans. Developed several novel design patterns for AI-driven experiences that have been adopted into IBM's Carbon Design System, including one for which I hold a patent. Work across a globally distributed team, serving as the connective tissue between product, engineering, and data science. Translate user needs into technically viable solutions and help the team find the path forward when what users need meets what's possible to build. Drive user research with network operators to ground roadmap decisions in real workflows, with a focus on building operator trust in AI agents through the right level of human-in-the-loop control and explainability.

APR 2022 – JAN 2024

Senior UX Designer

Expero

Collaborated with major financial service organizations and industry-leading companies, including Fidelity, S&P, and IHS Markit, to modernize and revamp complex internal applications. Engaged with business stakeholders to elicit requirements, develop conceptual solutions, streamline workflows, and produce interactive prototypes. Simplified intricate workflows and business processes through the application of UX best practices, innovative solutions, and a strong focus on visualization.

JUN 2016 – APR 2022

Principal Product Designer

Netspend

Investigated user needs and competitor products using structured quantitative and qualitative research. Concepted, prototyped and supported deployment within an agile development process. Worked with internal

stakeholders, such as Customer Service and Legal, to identify and mitigate specific issues, saving the company time and money as well as significantly improving the user experience. Developed and maintained a robust pattern and component library for consumption of the entire design department. Collaborated with my team to completely revamp the structure and navigation of the company's primary app to dramatically increase feature engagement as well as creating opportunities for the user to self-serve, lowering customer service calls.

NOV 2014 – JUN 2016

UX Consultant

Design for Use

Tackled complex user interface problems for clients in a large spectrum of businesses, from telecommunications dashboards to e-commerce platforms to healthcare apps. Developed testing plans, created prototypes and assessed changes needed based on qualitative in-person research with actual users.

JUL 2013 – JUN 2014

Senior UX/UI Designer

BDX

Redesigned and iterated the company's flagship ad and listing-driven website. Developed simple system rules to meet user expectations within existing limitations of an established platform. Created the overall look and feel of the website, as well as the branding. Collaborated with stakeholders and listened to customer input to accomplish business goals while maintaining a useful and multi-faceted search tool for the consumer. Dramatically increased traffic to the site as well as increased advertising revenue.

SEP 2010 - JUN 2013

Interactive Art Director

Brokaw

Worked with vitaminwater, Samsung and Hotels.com as well as other brands to create interactive projects that supported the client goals and marketing campaigns. Concepted and developed advertising in all mediums, but specifically digital creative.

Education

BFA Communication Design from Texas State University, summa cum laude, 2000

Greetings!

I am writing to express my keen interest in the Principal User Experience position at Oracle.

The scale and reputation of Oracle have long been a source of admiration for me, and I am excited about the opportunity to contribute to your organization. The career opportunities at Oracle present more than just a job; they offer an avenue for continuous learning and professional growth.

What particularly draws me to this role is the chance to tackle complex UX challenges. I have a proven track record of solving intricate problems to create user-friendly experiences and genuinely enjoy it. Oracle's commitment to innovation aligns perfectly with my passion for crafting solutions that leave a lasting impact.

I am confident that my skills and enthusiasm for solving complicated UX problems can contribute significantly to Oracle's continued success. I am eager to discuss how my background aligns with the needs of your team in more detail.

Thank you for considering my application. I look forward to talking soon.

Best regards,
Wes Jones

Subject: Application for Senior Product Designer at LeafLink

Greetings!

I hope this message finds you well. I'm excited about the Senior Product Designer opening at LeafLink and would love to bring my experience in B2B financial software, gained at companies like Fidelity and S&P, to contribute to LeafLink's innovative work in the cannabis industry.

LeafLink's commitment to streamlining operations and fostering growth in the cannabis space sounds very exciting to me. I'm eager to be a part of your dynamic team and contribute to the exciting advancements in this industry.

Thank you for considering my application. I'm looking forward to the possibility of discussing how I can contribute to LeafLink's success.

Best,
Wes Jones

Subject: Application for Principal Product Designer at OJO

Greetings!

I'm genuinely excited about the opportunity within the Movoto Experience Team—it resonates well with my background in UX design and my extensive experience crafting user-centric solutions for real estate platforms, including handling substantial user bases, even those that reach into the millions. Successfully managing the user experience of such platforms has been a significant part of my journey, and I'm eager about the prospect of contributing to OJO's goal of delivering an exceptional experience for countless homebuyers.

Recently, my focus has been on business applications, but I've missed the dynamic and fulfilling aspects of designing for everyday consumers. Throughout my career, my driving force has been a sincere passion for empowering users with practical solutions. I'm eager to bring this enthusiasm to OJO, confident that my hands-on experience and commitment to user-focused design make me a solid fit for playing a key role in OJO's ongoing success in transforming the real estate tech scene.

Best,
Wes Jones
